

CALL FOR PAPERS— EXTENSION

49th Annual British Columbia Mine Reclamation Symposium

Fort St. John, BC, September 21st to 24th, 2026

The British Columbia Technical and Research Committee on Reclamation (TRCR) invites authors to submit written technical papers for oral presentation that address a wide range of reclamation practices including planning, implementation, effectiveness monitoring, regulation, and Indigenous leadership and collaboration.

Why present at the BC Mine Reclamation Symposium?

- You get exposure for your good ideas and great work in the field of reclamation.
 - You give other practitioners the chance to learn from your experiences.
 - It is the best way to network—attendees will come to talk to presenters!
- Your paper is publicly available as noted below, so there is a record of your work.

The TRCR actively welcomes participation from Indigenous nations and members of other BC communities. We encourage you to share your knowledge and experience with mine reclamation projects or mine applications in regulatory assessment, through a presentation or panel discussion. We will consider your proposals for presentations with or without accompanying papers.

Please **e-mail** abstracts (maximum 300 words) by **May 7th, 2026**, to:

Justin Straker, Technical Sessions and Papers Sub-Committee Chair.
E-mail: jstraker@iegconsulting.com

Final papers are due by **June 26th, 2026**.

Annual papers are published and accessible on the University of British Columbia [cIRcle](#). Please also check the website for Symposia updates at:
