Dear BC Mine Representative:

Re: Request for Video Footage for the 49th Annual British Columbia Mine Reclamation Symposium

On behalf of the British Columbia Technical and Research Committee on Reclamation (BC TRCR), please accept this request for audiovisual materials of reclamation efforts at your BC mine operation(s) for use at the **49th Annual British Columbia Mine Reclamation Symposium** to be held September 21st to 24th, 2026 in Fort St. John, BC.

We are ideally looking for good quality video footage including narration. All reclamation topics are encouraged and will be considered. If your footage is selected by the TRCR committee for the symposium, it may be produced with footage from other sites into a Virtual Mine Tour and be presented live during the symposium. During film production, we may require sound bites or other documents, such as maps and still photos, for our use to add value to the virtual tour. The footage does not have to have been captured solely this year, and if you have older footage to help illustrate the 'before and after', that would be most welcome.

If you are interested in providing footage, please contact me to arrange. We are asking for confirmation of participation by July 31st, 2026, and submission of footage by September 4th, 2026, to allow time for video compilation and production.

On behalf of the BC TRCR, thank you in advance for helping us provide the best experience possible to our mine reclamation community. If you have any questions, do not hesitate to reach out by phone or email. We are looking forward to seeing everyone in person this fall!

Sincerely,

Kelly Dubé

A committee of representatives from British Columbia's mining industry, government and universities,
resolving environmental concerns since 1975.

Mailing Address PO Box 9320 Stn Prov Govt, Victoria, BC V8W 9N3 **Web** trcr.bc.ca **Twitter** @TRCR

About the TRCR:

The TRCR is a not for profit committee that originated in the early 1970's, in response to a demonstrated need in the province BC for greater government-industry communications in the area of environmental protection and reclamation associated with mining. Since 1977, the TRCR has annually sponsored the British Columbia Mine Reclamation Symposium to foster the exchange of information and ideas on reclamation.

The Reclamation Symposium is BC's premier forum for sharing new developments in the technology and techniques of mine reclamation amongst industry, government, First Nations, suppliers, consultants and contractors. It is a celebration of successes and advances made by reclamation practitioners and encourages continued progress needed to keep mining sustainable.
